

Course Specification

Course Title	Basic Principles in Occupational Hygiene			
Code	W201			
Level	Foundation	<input checked="" type="checkbox"/> Intermediate	<input type="checkbox"/> Advanced	<input type="checkbox"/>
Pre-requisites	None			
Course Material	Available from OH learning.com			
Coordinating Editor	Kerrie Burton			
Approval Date	October 2010			
Review Date	October 2013			

Aims

The course aims to:

Provide an introductory course outlining the broad principles of Occupational Hygiene as the basis for anticipation, recognition, evaluation and control of hazards that can be encountered in the workplace.

Learning Outcomes

On completing this course successfully the student will have a basic understanding of:

- the value of occupational hygiene and the role of the occupational hygienist;
- the range of hazards [physical and chemical] in the workplace;
- hazard recognition techniques;
- sources and potential routes of exposure;
- hazard evaluation, exposure assessment and the measurement processes;
- methods of controlling exposure;
- the management of occupational hygiene programmes.

Course Format

The course is normally run as a taught course over 4.5 days [minimum of 36 hours including practical/demonstration sessions, overnight questions and guided reading].

There will be a 20 short answer question “open book” examination with an allowed time of 60 minutes.

Target Audience

Health and safety professionals, occupational health specialists [including physicians and nurses]. Specialists in subjects such as acoustics, ergonomics, human factors, occupational psychology, work organisation, biosafety, acoustics, engineering, or analytical chemistry who want a broader appreciation of how their role interfaces with other professions over health issues in the workplace.

Content

Topic	Title	Time Allocation
1	Introduction	5%
2	Human Physiology	15%
3	Chemical Hazards Recognition	20%
4	Physical Hazards Recognition	20%
5	Hazard Evaluation	20%
6	Control of Hazard	20%

Detailed Breakdown of Course Content

1 Introduction (5%)

- 1.0.1 Definition of occupational hygiene
- 1.0.2 History and background of the development of occupational hygiene
- 1.0.3 The importance of occupational hygiene today
- 1.0.4 Overview of qualifications and careers in occupational hygiene

2 Human Physiology (15%)

An introduction to the physiology of the human body and how it can be affected by occupational exposure to chemical and physical agents.

- 2.0.1 General metabolism
- 2.0.2 Respiratory system
- 2.0.3 Circulatory system
- 2.0.4 Sight
- 2.0.5 Hearing
- 2.0.6 Heat regulation

3 Chemical Hazards Recognition (20%)

3.1 Terminology and Information Gathering

Basic principles of risk assessments, definitions of hazard and risk with brief mention of expert systems and control banding.

- 3.1.1 Hazard and Risk
 - Definition of terms
- 3.1.2 Sources of information:
 - Material safety data sheets
 - Guidance documents
 - Literature, Web Sites
 - COSHH essentials

3.2 Effects on the Body

- 3.2.1 Basic principles of toxicology;
 - Routes of entry into the body [inhalation, ingestion, absorption, metabolism]
 - Effects on the body [acute, chronic, systemic and localised]
 - Types of effect [asphyxiation, irritation, trauma, poisoning]
 - Toxicity testing [related terminology]

3.3 Material Form

- 3.3.1
 - Gases, vapours, aerosols
 - Dusts [respirable and inhalable]
 - Fumes
 - Vapour pressure

3.4 Hazardous Processes

Illustration of where common hazardous substance/processes occur and their effects on the body.

[The processes listed below should be regarded as examples, some of which will be covered. It is expected that at least one from each group would be used during the course, individual processes will not be examined]

3.4.1 Mineral Materials

- Silica; [quarrying and mining, brick, tile and refractory manufacture, pottery and ceramic, sandblasting, glass manufacture]
- Asbestos: [uses, building surveys, sampling and analysis, remediation/removal]
- Machine made mineral fibre {MMMMF} [manufacture and utilisation]

3.4.2 Metal Processes

- Metal refining [furnaces, foundries, casting]
- Machining [cutting, grinding, polishing]
- Treatments [degreasing, plating, pickling, anodising]
- Welding [arc welding, gas welding, brazing, soldering]

3.4.3 Organic Chemical Processes

- Solvents: [degreasing and dry cleaning (halogenated hydrocarbons)]
- Paints [application methods (brushed or sprayed)]
- Hydrocarbons and their use [benzene, toluene, xylene, n-hexane]
- Pesticides [fumigants, spraying, animal dipping]
- Plastics and polymers; [polymer manufacture, rubber manufacture, use of resins in reinforced structures (glass or carbon fibre), isocyanate forms and uses]
- Pharmaceuticals and fine chemicals [handling and use of bioactive materials and asthmagens]

3.4.4 Other Processes

- Woodworking
- Biological hazards [animals, farming, water treatment, legionella]

4 Physical Hazards Recognition (20%)

- 4.0.1 Noise [overview of the physics of sound and units of measurement and the effects of noise]
- 4.0.2 Vibration [overview of the physics of vibration and its health effects on the whole body and locally]
- 4.0.3 Thermal stress [introduction to human responses to the thermal environment and ways to evaluate it]
- 4.0.4 Introduction to the electromagnetic spectrum and the various bands of non-ionizing radiation. [ultra violet, infra red, microwave, lasers]
- 4.0.5 Lighting and assessment in the workplace [effects of poor lighting and glare]
- 4.0.6 Ionising radiation [introduction to health effects of ionizing radiation, exposure assessment and control techniques and the specialist roles of those who deal with it]
- 4.0.7 Introduction to musculoskeletal injuries, ergonomics and the role of the ergonomist
- 4.0.8 Overview of the hazards associated with the use of Display Screen Equipment and how they should be managed
- 4.0.9 Introduction to stress and its management in the workplace

5 Hazard Evaluation (20%)

5.1 Exposure Assessment

Measurement of Gases Vapours and Dusts

An introduction to :

- 5.1.1 Measurements [vapours, gases aerosols and dust using techniques for spot, personal, static and real time sampling]
- 5.1.2 Analytical methods
- 5.1.3 Hygiene standards and occupational exposure limits
- 5.1.4 Units of measurement, time-weighting, simple calculations/algebra
- 5.1.5 Compliance with statutory limits
- 5.1.6 Standard setting
- 5.1.7 Biological monitoring and health surveillance

5.2 Exposure Assessment [Physical Hazards]

Assessment of Physical Hazards

An introduction to :

- 5.2.1 Noise measurement
- 5.2.2 Measurement of the thermal environment
- 5.2.3 Introduction to principles of assessment of vibration
- 5.2.4 Introduction to principles of assessment of lighting and non-ionising radiation
- 5.2.5 Introduction to principles of assessment of ionising radiation
- 5.2.6 Introduction to principles of ergonomic risk assessment

6 Control of Hazard (20%)

Outline of the main elements within the hierarchy of control.

An introduction to:

- 6.0.1 Elimination/substitution of the hazard
- 6.0.2 Basic principles of ventilation
- 6.0.3 Local exhaust ventilation design
- 6.0.4 Personal protection
- 6.0.5 General ventilation and air conditioning

Learning and Teaching Activities

Learning Time [hours]		
Scheduled contact hours: <i>[Note: these timings are indicative only]</i>	Lectures	16
	Seminars [including homework feedback]	4
	Practical sessions and demonstrations	6
	Tutorials	2
	Examinations [including preparation]	4
	Other scheduled time	0
Guided independent study <i>[Note: include in guided independent study preparation for scheduled sessions, follow up work, wider reading or practice, revision]</i>	Independent coursework	4
	Independent laboratory work	0
	Other non-scheduled time	0
Total Hours		36

Assessment Details

Methods of Assessment	Open book examination based upon the W201 Student Manual
Grading Mode	Summative
Weighting %	100%
Pass Mark	60%
Outline Details	20 short answer questions to be answered in 60 minutes. The questions require candidates to write short answers of varying length but around 35 words maximum. Some questions may require multiple answers. Some questions may require calculations. Students can only refer to the W201 Student Manual during the examination.
